

Introduction

The Muslim Company is a faith-driven, civilization-oriented global company built upon the teachings of the Quran and authentic Sunnah. The company follows a Shariah-compliant and Prophetic model in business, leadership, ethics, social welfare, education, research, technology, and human development.

The purpose of the company is not only commercial success, but also the development of humanity, establishment of justice, protection of moral values, advancement of knowledge, and rebuilding a strong ethical civilization.

The company seeks to contribute toward restoring the Muslim world's historical excellence in science, philosophy, literature, medicine, economics, technology, education, governance, and social development.

Core Mission

- Serve humanity through ethical and Shariah-compliant systems
 - Build a global Islamic ethical business ecosystem
 - Ensure human welfare and social justice
 - Make food, clothing, housing, education, and healthcare more accessible
 - Support research, science, innovation, and technology
 - Create sustainable economic opportunities
 - Promote knowledge, morality, and human dignity
 - Revive the legacy of Muslim civilization through ethical development
-

Vision Statement

"To build a civilization-driven global company inspired by the Quran, authentic Sunnah, and the Prophetic model — empowering humanity through ethical business, knowledge, innovation, justice, sustainability, and social development."

Organizational Philosophy

The company believes:

- Business should serve humanity
 - Knowledge and morality must go together
 - Economic development must remain ethical
 - Nature and creation are trusts from Allah
 - Human welfare is a responsibility, not only a strategy
 - Long-term success comes through honesty, justice, discipline, and service
 - Ethical and halal wealth contains true barakah
-

Islamic Foundation

The Muslim Company will:

- Follow the Quran and authentic Hadith
 - Operate according to Shariah principles
 - Maintain halal business operations
 - Remain free from riba (interest), bribery, corruption, fraud, exploitation, and unethical financial practices
 - Promote justice, honesty, discipline, modesty, and accountability
-

Allah-Centered Business Philosophy

The company believes that Allah is the ultimate provider of rizq, success, protection, and barakah.

Therefore:

- Every month, 10% of the company's net profit will be allocated for charity and humanitarian causes in the path of Allah.
- This contribution will support mosques, madrasas, education, healthcare, poor communities, social development, disaster relief, orphan support, widow support, and humanitarian welfare projects.
- At the end of every financial year, proper zakat will also be calculated and distributed according to Islamic principles.
- Beyond obligatory charity, the company will continue helping people through additional welfare and social support programs.

The company believes:

"Businesses that maintain honesty, justice, charity, and the pleasure of Allah receive barakah and long-term stability."

Environmental & Creation Care Principles

The company believes that nature, animals, forests, rivers, mountains, ecosystems, and all living beings are creations of Allah and trusts upon humanity.

Therefore:

- No development will intentionally destroy nature
- Environmental balance must be protected
- Animals and wildlife must be treated with mercy and responsibility
- Sustainable and environmentally responsible systems will be used
- Renewable and clean energy will be encouraged
- Pollution and waste will be minimized
- Wildlife and biodiversity protection initiatives will be supported

- Tree plantation and ecological restoration programs will be encouraged

The company believes:

“Human development should never come through the destruction of Allah’s creation.”

Areas of Work

The company intends to work across almost all beneficial and halal sectors of human civilization, including:

- Agriculture & Food
 - Education & Research
 - Technology & AI
 - Healthcare & Medicine
 - Construction & Housing
 - Renewable Energy
 - Media & Journalism
 - Software & Cybersecurity
 - Manufacturing & Industry
 - Islamic Finance & FinTech
 - Transportation & Logistics
 - E-commerce
 - Literature & Publishing
 - Philosophy & Civilization Studies
 - Scientific Research
 - Social Welfare & Humanitarian Work
 - Environmental Protection
 - Robotics & Automation
 - International Trade
 - Community Development
-

Workforce Structure

The company aims to maintain a workforce where the majority are Muslims while also allowing qualified people from other religions to work respectfully within the company’s ethical and professional guidelines.

All employees, regardless of religion, must respect the company’s rules, ethics, discipline, and professional culture.

Women’s Workplace System

The company will establish separate and secure working environments for women.

Policies include:

- Separate office spaces and facilities
 - Privacy and modesty-focused environments
 - Respectful communication policies
 - Safe and secure workplaces
 - Opportunities for professional development within Islamic ethical guidelines
-

Maternity Leave Policy

Women employees may receive maternity leave ranging from 1 year to 1.5 years.

During maternity leave:

- The employee will continue receiving 30% of her main salary while staying at home.
- The remaining 70% salary allocation may be used to hire a temporary or part-time employee to continue the workflow.
- After the leave period, the original employee may return to her previous position.

The company prioritizes:

- Maternal health
 - Child welfare
 - Family stability
 - Respect for motherhood
-

Long-Term Employee Welfare & Pension Policy

Employees who serve the company with honesty, loyalty, and professionalism for 15 years or more will qualify for long-term service benefits.

Potential support includes:

- Pension systems
- Monthly retirement support
- One-time retirement assistance
- Emergency welfare support
- Family assistance programs
- Long-service appreciation benefits

The company believes long-term workers deserve security, dignity, and respect.

Employee Rights & Welfare

The company will ensure fair treatment for all workers from the lowest-level workers to top executives.

Employees will receive:

- Fair salaries and benefits
 - Safe work environments
 - Respectful treatment
 - Training and development opportunities
 - Welfare and support systems
 - Justice and complaint resolution systems
-

Islamic Conduct & Lifestyle Expectations

The company seeks to build an ethical and disciplined culture where employees uphold Islamic values not only inside the workplace but also in their personal conduct.

Employees are encouraged to maintain:

- Honesty
- Good manners
- Discipline
- Respectful communication
- Islamic moral behavior
- Responsibility toward family and society
- Modesty and professionalism

The workplace environment will support:

- Prayer facilities
 - Ethical conduct
 - Cleanliness and discipline
 - Respectful communication
 - Moral education
-

Recruitment & Leadership Policy

Recruitment and leadership development will prioritize:

- Knowledge and education
- Professional skills
- Character and honesty
- Discipline and responsibility
- Islamic ethics and manners
- Leadership ability
- Service mentality

Special respect and consideration may be given to individuals who:

- Have strong Quran recitation skills

- Are Huffaz of the Quran
- Understand Shariah and Islamic ethics deeply
- Demonstrate strong moral character and discipline
- Maintain respectful and responsible lifestyles

The company believes:

“Knowledge, morality, character, and skill together create strong leaders and strong civilizations.”

Dress Code & Professional Appearance

The company will maintain a modest, organized, disciplined, and professional dress culture.

Professional attire may include:

- Shirts
- Polo shirts
- T-shirts
- Trousers
- Jeans following professional standards

Employees must maintain:

- Cleanliness
 - Modesty
 - Professional appearance
 - Respectful presentation
-

Shariah-Compliant Investment & Financial Ethics

All investors, partners, and stakeholders must comply with Shariah-based investment principles.

The company will remain completely free from:

- Interest (Riba)
- Bribery
- Corruption
- Fraud
- Gambling
- Exploitative finance
- Haram industries
- Unethical financial activities

The company believes halal wealth and ethical business create sustainable prosperity and barakah.

Shariah Governance & Oversight

The company may establish a Shariah advisory and ethical oversight structure to ensure:

- Shariah compliance
 - Ethical governance
 - Financial accountability
 - Transparency
 - Halal operational standards
-

Humanitarian Development Goals

The company aims to:

- Reduce poverty and inequality
 - Improve education and healthcare accessibility
 - Promote ethical technology and research
 - Support sustainable development
 - Build future universities, research centers, hospitals, and innovation hubs
 - Develop skilled and ethical future generations
 - Contribute toward a balanced and just civilization
-

Ethical Succession & Mission Protection Constitution

Long-Term Vision Preservation System

The Muslim Company believes that many great institutions in history lost their original mission because of greed, corruption, political influence, unethical leadership, or loss of moral direction.

Therefore, the company intends to establish a long-term constitutional framework to permanently protect:

- The Prophetic Model foundation
- Shariah compliance
- Ethical governance
- Humanitarian mission
- Environmental responsibility
- Transparency and accountability
- Civilization-focused vision

This framework will aim to prevent:

- Mission drift

- Hostile takeover
 - Political control
 - Ethical corruption
 - Unethical commercialization
 - Profit-over-humanity culture
-

Leadership Qualification Framework

Future leaders, executives, directors, and strategic decision-makers should be evaluated based on:

- Knowledge and competence
- Honesty and amanah
- Islamic ethics and discipline
- Leadership ability
- Service mentality
- Long-term responsibility
- Justice and accountability

Leadership should not only represent authority, but also moral responsibility.

Employee Education & Development System

The company may establish continuous development programs for employees including:

- Islamic ethics education
- Technology and AI training
- Leadership development
- Communication and professionalism training
- Financial literacy programs
- Mental wellness and personal development
- Research and innovation support

The company believes that educated and morally strong employees create stronger institutions.

Employee Family Welfare System

Long-term employee support may include:

- Educational scholarships for children
 - Emergency family support
 - Healthcare assistance
 - Orphan and widow support initiatives
 - Housing assistance programs
 - Employee family counseling and welfare systems
-

Ethical AI & Technology Policy

The company believes advanced technology must remain under ethical control.

Therefore, AI and digital systems developed or used by the company should avoid:

- Human exploitation
- Addiction-based manipulation
- Mass misinformation
- Privacy abuse
- Psychological harm
- Unethical surveillance
- Harmful automation practices

Technology should remain humanity-centered and ethically supervised.

Data Privacy & Information Protection

Customer, employee, and organizational data will be treated as amanah.

The company may establish:

- Strong cybersecurity systems
- Encrypted communication systems
- Secure cloud infrastructure
- Access-controlled databases
- Responsible data management frameworks

Personal information should not be sold, abused, or exploited.

Future Civilization Research Center

The company may establish dedicated research institutions focusing on:

- Islamic civilization studies
- Ethical economics
- Future technologies
- AI ethics
- Environmental sustainability
- Social development
- Education reform
- Geopolitics and global development
- Healthcare innovation
- Humanitarian systems

The goal is to build knowledge-driven long-term civilizational progress.

Knowledge Revival Mission

The company seeks to help revive the Muslim world's tradition of:

- Scientific research
- Philosophy and intellectual development
- Ethical leadership
- Innovation and invention
- Medical advancement
- Education and scholarship
- Literature and publishing

Ethical Media & Information Policy

Company media systems should remain:

- Truth-based
- Responsible
- Educational
- Ethical
- Free from propaganda and misinformation

The company will avoid:

- Fake news
- Manipulative content
- Hate-based communication
- Unethical sensationalism
- Immoral promotional systems

Ethical Entertainment & Educational Content

The company may produce:

- Educational documentaries
- Ethical animation
- Children's learning content
- Historical and civilization-focused media
- Scientific and educational programs
- Islamic educational content

All content should maintain ethical and modest standards.

Anti-Monopoly & Economic Justice Policy

The company believes markets should not become systems of oppression.

Therefore, the company will try to avoid:

- Artificial market manipulation
 - Unfair monopoly systems
 - Hoarding-based exploitation
 - Destructive syndicate culture
 - Abuse of economic dominance
-

Fair Wage & Compensation Philosophy

The company believes workers deserve dignity and fair treatment.

The company may establish systems to ensure:

- Fair wages
 - Responsible executive compensation
 - Worker welfare balance
 - Ethical salary structures
 - Long-term employee financial stability
-

Disaster Response & Humanitarian Relief Division

The company may establish emergency response systems for:

- Floods
- Earthquakes
- Famines
- War-related humanitarian crises
- Refugee support
- Emergency food and medical aid

Humanitarian assistance should remain organized, transparent, and dignity-focused.

Minimal Waste & Sustainability Policy

The company will encourage:

- Sustainable production
- Waste reduction
- Recyclable systems
- Eco-friendly packaging
- Resource efficiency
- Repair-friendly products
- Long-lasting product design

The company believes unnecessary waste harms both humanity and nature.

Muslim Talent Development Platform

The company may build global talent networks to support:

- Skilled Muslim youth
- Researchers and innovators
- Ethical entrepreneurs
- Scientists and engineers
- Educators and scholars

The goal is to build a strong ethical knowledge ecosystem.

Global Halal Business Network

The company may collaborate with ethical and halal-focused businesses around the world to create:

- Trusted supply chains
 - Ethical trade networks
 - Halal investment ecosystems
 - Research collaborations
 - Educational partnerships
-

Public Suggestion & Participation System

The company may create systems where the public can:

- Submit ideas
- Report concerns
- Suggest improvements
- Participate in ethical discussions

- Provide social feedback

The company believes public trust grows through participation and transparency.

Crisis Management & Stability System

The company may establish contingency systems for:

- Economic instability
- Cybersecurity attacks
- Infrastructure disruption
- Operational emergencies
- Supply chain crises
- Natural disasters

This system aims to maintain stability and continuity responsibly.

Backup Infrastructure & Continuity Protection

The company may maintain:

- Backup operational systems
 - Emergency communication systems
 - Distributed data protection
 - Alternative logistics planning
 - Crisis continuity infrastructure
-

Spiritual & Moral Development Environment

The company seeks to build a balanced corporate culture that supports:

- Spiritual growth
- Moral discipline
- Personal responsibility
- Ethical character
- Healthy work-life balance
- Emotional and mental well-being

The company believes long-term success requires both technical excellence and moral strength.

Long-Term Global Vision

The Muslim Company aims to gradually build:

- Global educational institutions
 - Ethical technology ecosystems
 - Research universities
 - Humanitarian development networks
 - Halal financial infrastructure
 - Ethical healthcare systems
 - Advanced research centers
 - Responsible AI institutions
 - Ethical media platforms
 - Civilization-scale development systems
-

Political Neutrality & Peaceful Coexistence Policy

Independent Ethical Institutional Framework

The company will not become a political party or a tool of political power.

The company believes:

- Ethical development is more important than political domination
- Peaceful coexistence is necessary for social stability
- Power should never be abused for corporate gain
- Corruption, bribery, and political manipulation destroy justice

The company will avoid:

- Political exploitation
- Unethical lobbying
- Bribery-based influence
- Hate and division politics
- Abuse of authority

The company seeks to contribute through:

- Knowledge
 - Ethical business
 - Humanitarian work
 - Employment creation
 - Research and innovation
 - Social development
 - Peaceful cooperation
-

Prophetic Model Governance System

The entire company will operate according to a Prophetic Model inspired by:

- The Quran
- Authentic Sunnah
- Justice
- Mercy
- Knowledge
- Amanah
- Ethical responsibility
- Human welfare

The company believes:

- Faith must remain above greed
- Profit must not destroy morality
- Technology must remain under ethics
- Leadership must serve humanity
- Development must remain balanced with nature and justice

The Prophetic Model will guide:

- Governance
- Economy
- Workplace culture
- Humanitarian systems
- Research and innovation
- Social development
- Environmental responsibility
- Leadership ethics

Ethical Commerce, Pricing & Distribution System

The company may:

- Produce products internally
- Maintain company-controlled warehouses
- Operate its own logistics and delivery systems
- Sell through official online platforms
- Work with authorized resellers

The company will maintain pricing transparency.

Products may include:

- Production cost
- Operational cost

- Official selling price
- Maximum reseller price
- Verification identity

The company will oppose:

- Artificial price manipulation
- Syndicate exploitation
- Crisis profiteering
- Hoarding-based abuse

If production costs increase later:

- Existing inventory prices will remain unchanged
- Only newly produced batches may receive updated pricing
- New pricing categories will be clearly identified

Product Verification & Authentication System

All important products, services, certificates, warranties, and official systems may include:

- Unique verification codes
- QR verification systems
- Serial authentication
- Digital identity tracking

Customers should be able to verify:

- Product authenticity
- Official pricing
- Batch information
- Warranty status
- Authorized seller identity

The company may operate:

- Online verification systems
- Call center verification support
- Anti-counterfeit monitoring systems

Customer Support & Ethical Communication System

The company will maintain ethical communication standards.

The company will avoid:

- Immoral advertisements
- Harām promotional systems
- Indecent media practices
- Exploitative emotional marketing

Support systems may include:

- 24/7 hotline support
- Live chat systems
- Email support
- Official messaging support
- Customer help portals

Refund Delay Compensation Policy

The company believes customer funds are amanah.

If:

- Refunds are delayed beyond the promised time
- Payment failures occur due to company systems
- Legitimate customer funds remain blocked

Then:

- Compensation may be added after the deadline
- Additional compensation may increase according to delay duration
- The customer should receive the adjusted final amount transparently

The purpose is to:

- Protect customer trust
- Reduce negligence
- Increase accountability
- Ensure financial responsibility

Internal Ethics, Security & Accountability Division

The company may establish a special confidential internal division directly accountable to the Founder.

Responsibilities may include:

- Preventing corruption

- Detecting unethical behavior
- Monitoring operational abuse
- Investigating information leaks
- Protecting organizational integrity
- Reviewing internal complaints

The Founder may directly appoint trusted individuals into this division.

Complaint & Whistleblower System

The company may establish:

- Offline complaint boxes
- Online reporting systems
- Anonymous reporting channels
- Ethical concern submission platforms

Access may remain limited to:

- Internal Ethics Team
- Founder & CEO

Whistleblower protection principles may include:

- Confidentiality
 - Anti-retaliation protection
 - Fair investigation systems
 - Evidence-based review
-

Annual Audit & Public Transparency System

At the end of every year, the company may conduct:

- Financial audits
- Shariah audits
- Operational reviews
- Ethical compliance reviews
- Environmental impact reviews
- Welfare and zakat reviews

Publicly shareable information may be released transparently.

Annual public reports may include:

- Revenue and expenditure summaries
- Zakat and charity distributions
- Tax and VAT payments
- Welfare activities

- Humanitarian achievements
- Ethical governance updates
- Environmental projects
- Public accountability summaries

The company may publicly publish:

- Tax receipts
- VAT documentation
- Audit summaries
- Charity proof documentation

Social Welfare & Human Dignity Mission

The company believes low-income and working-class people should not lose access to:

- Education
- Healthcare
- Food
- Clothing
- Housing
- Knowledge
- Opportunity

The company may establish:

- Scholarship systems
- Healthcare support funds
- Affordable food systems
- Housing support projects
- Worker welfare programs
- Employment development initiatives
- Skill development centers

The company seeks to help protect the dignity and future of vulnerable families.

Founder's Aspiration & Global Vision

Founder & CEO Shariful Islam has a long-term aspiration that:

- The Muslim Company becomes globally recognized
- The company becomes one of the world's most trusted ethical corporations
- A practicing Muslim-led ethical civilization-scale company becomes globally successful

The Founder believes:

"Allah is the owner of everything. Rizq, honor, power, and success come only from Allah."

The company's vision is not based only on wealth, but on:

- Humanitarian benefit
 - Ethical leadership
 - Muslim empowerment
 - Knowledge revival
 - Halal economic development
 - Global civilization-building
-

Global Multi-Sector Civilization Vision

The company believes no beneficial and halal sector should remain outside ethical development.

Therefore, the company may work across nearly all beneficial sectors including:

- Education
- Healthcare
- Technology
- AI
- Agriculture
- Finance
- Media
- Manufacturing
- Research
- Transportation
- Environment
- Construction
- Humanitarian work
- International trade
- Robotics
- Innovation systems

The company aims to build an integrated civilization-scale ecosystem.

Supreme Shariah Board Approval Authority

The Supreme Shariah Board is the highest ethical and Shariah approval authority within the company.

No major:

- Project
- Product
- Technology
- Investment
- Service
- Research initiative
- Media activity

- Marketing campaign
- Financial structure
- Partnership

Can officially begin without Board approval.

The Board will evaluate based on:

- Quran
- Sahih Hadith
- Ijma
- Qiyas
- Scientific evidence
- Ethical reasoning
- Social impact
- Human welfare
- Environmental effect
- Long-term civilization consequences

The Board may:

- Approve
- Conditionally approve
- Restrict
- Suspend
- Reject
- Revoke previous approval

Even after approval, if future evidence proves harm, the Board may:

- Cancel approval
- Stop production
- Recall products
- Shut down services
- Force withdrawal from harmful sectors

The Board may also consult:

- Scholars
- Scientists
- Professors
- Doctors
- Engineers
- Economists
- Psychologists
- Environmental experts
- Technology specialists

The company believes ethical truth must remain above profit pressure.

Amanah-Based Leadership & Accountability System

Leadership as Responsibility Before Allah

The company believes leadership is not a symbol of superiority or personal privilege. Leadership is amanah (trust) and accountability before Allah.

Inspired by Quranic principles and Prophetic ethics, leaders within the company should:

- Serve people with humility
- Protect justice and fairness
- Avoid arrogance and abuse of power
- Remain transparent and accountable
- Prioritize truth over personal benefit
- Protect the weak and vulnerable
- Maintain honesty in all decisions

The company believes:

“True leadership is measured by responsibility, service, justice, and moral integrity.”

Shura (Consultation) Governance Framework

Inspired by the Islamic principle of Shura, the company believes important decisions should involve consultation, wisdom, and collective expertise.

The company may establish:

- Expert consultation councils
- Strategic advisory committees
- Ethical review sessions
- Community feedback systems
- Emergency consultation mechanisms

The company believes consultation strengthens:

- Justice
 - Wisdom
 - Stability
 - Transparency
 - Long-term decision quality
-

Maqasid al-Shariah Protection Framework

The company seeks to align its governance with the higher objectives of Shariah.

The company aims to protect:

- Faith and religious integrity
- Human life and safety
- Human intellect and education
- Wealth and economic justice
- Family and social stability
- Human dignity and honor
- Environmental balance and creation

Every major policy, technology, product, or project should be reviewed according to its impact on these principles.

Anti-Waste & Responsible Resource System

Inspired by Quranic teachings against wastefulness, the company believes unnecessary waste harms humanity, society, and nature.

The company may encourage:

- Sustainable production
- Minimal waste systems
- Responsible energy use
- Food waste reduction
- Water conservation
- Long-lasting product design
- Repair and recycling systems

The company believes resources are blessings and trusts from Allah.

Ethical Wealth Circulation Philosophy

The company believes wealth should not become concentrated only among powerful groups.

The company may support:

- Ethical wealth circulation
- Small business empowerment
- Worker development opportunities
- Community investment initiatives
- Halal economic participation systems

The company believes economic systems should strengthen society rather than exploit it.

Worker Dignity & Labor Rights Charter

Inspired by Prophetic teachings regarding workers and labor rights, the company believes workers deserve dignity, fairness, and respect.

The company seeks to ensure:

- Timely salary payment
- Fair contracts
- Safe working environments
- Respectful treatment
- No humiliation culture
- Welfare and support systems
- Skill development opportunities

The company believes workers are not disposable resources, but valuable human beings.

Balanced Lifestyle & Family Protection System

The company believes success should not destroy family life, spirituality, health, or emotional well-being.

The company may encourage:

- Healthy work-life balance
- Respect for family responsibilities
- Prayer and spiritual support
- Jumu'ah-centered scheduling where possible
- Burnout prevention systems
- Mental and emotional wellness support

The company believes balanced lives create healthier societies and stronger institutions.

Ethical Procurement & Supply Chain Framework

The company seeks to maintain ethical sourcing systems.

The company may avoid suppliers connected with:

- Child exploitation
- Forced labor
- Unethical working conditions
- Environmentally destructive systems

- Haram or unethical industries

Supply chains should remain:

- Transparent
 - Responsible
 - Ethical
 - Sustainable
-

Public Trust Protection Charter

The company believes public trust is sacred.

The company will try to avoid:

- Deceptive advertising
- Hidden harmful risks
- False claims
- Exploitative business practices
- Deliberate misinformation

Customers and the public should receive:

- Honest communication
 - Transparent information
 - Fair treatment
 - Responsible support systems
-

Future Generational Responsibility Framework

The company believes decisions should not only benefit the present generation, but also protect future generations.

The company may consider:

- Long-term environmental impact
- Social stability
- Future technological consequences
- Educational development
- Moral and cultural effects
- Civilization sustainability

The company believes future generations also have rights over today's decisions.

Ethical Innovation & Technology Limits

The company believes not every technologically possible action is ethically acceptable.

The company may establish ethical restrictions regarding:

- Harmful AI systems
- Manipulative technologies
- Psychological exploitation systems
- Dangerous biotechnology
- Unethical surveillance systems
- Human dignity violations

Innovation should remain under moral and Shariah supervision.

Digital Civilization & Cyber Ethics Framework

The company believes digital systems shape modern civilization and therefore require ethical governance.

The company may promote:

- Ethical internet systems
- Privacy protection
- Child digital safety
- Anti-addiction digital design
- Responsible social technology
- Cybersecurity ethics
- Truthful information systems

The company opposes digital systems that intentionally damage human morality, mental health, or social stability.

Islamic Crisis Response & Humanitarian Doctrine

The company believes ethical responsibility becomes even more important during crisis situations.

During emergencies, the company may prioritize:

- Humanitarian support
- Price stability
- Essential goods access
- Fair distribution systems
- Disaster relief

- Refugee assistance
- Emergency healthcare support

The company opposes crisis exploitation and profiteering.

Reputation, Character & Public Conduct Policy

The company believes character and akhlaq are essential parts of institutional success.

The company encourages:

- Respectful communication
- Humility in success
- Responsible influence
- Ethical disagreement
- Avoiding arrogance and mockery
- Professional and moral public conduct

The company believes strong character builds long-term trust.

Institutional Corruption Protection System

The company recognizes that institutions can become corrupt over time if strong ethical protections do not exist.

The company may establish:

- Emergency ethical intervention systems
- Mission restoration processes
- Independent ethical oversight
- Constitutional protection mechanisms
- Long-term mission preservation frameworks

The company believes protecting ethics is a continuous responsibility.

Islamic Civilization Revival Charter

The company seeks to contribute toward the revival of:

- Knowledge and scholarship
- Scientific excellence
- Ethical research
- Innovation and invention
- Intellectual development
- Moral leadership

- Educational advancement
- Global Muslim collaboration

The company believes the Muslim world once contributed greatly to human civilization and can contribute positively again through knowledge, ethics, and responsible development.

Global Humanity & Peaceful Coexistence Charter

The company believes justice, mercy, and human dignity should benefit all people.

The company seeks to promote:

- Peaceful coexistence
- Human dignity
- Ethical development
- Compassionate systems
- Respectful cooperation
- Responsible global contribution

The company opposes hatred, oppression, exploitation, and unnecessary conflict.

Legacy & Sadaqah Jariyah Philosophy

The company believes success should not be measured only through:

- Revenue
- Wealth
- Market value
- Expansion

True success should also be measured by:

- Lives improved
- Knowledge created
- Injustice reduced
- Humanity benefited
- Ethical systems built
- Long-term positive impact
- Sadaqah Jariyah contribution

The company believes the most meaningful legacy is long-term benefit for humanity.

The Muslim Company Constitutional Book

The company may establish a permanent constitutional framework that protects:

- Core beliefs
- Prophetic governance principles
- Shariah foundations
- Ethical limits
- Leadership standards
- Mission protection systems
- Public accountability rules
- Crisis governance policies
- Future amendment procedures
- Civilization-focused vision

The purpose of this constitutional framework is to preserve the company's identity, ethics, and long-term mission for future generations.

Final Intention & Spiritual Foundation

The entire vision, mission, governance structure, humanitarian work, ethical business model, research, technology development, and civilization-focused dream of The Muslim Company is not built only for worldly success.

The greatest foundation of this company is:

- Seeking the pleasure of Allah
- Following halal and ethical principles
- Serving humanity
- Loving and following Prophet Muhammad ﷺ
- Trying to build something beneficial with sincerity and responsibility

Founder & CEO Shariful Islam believes:

"I do not know whether this company will become successful in the future, or whether I will be able to fully implement all of these plans properly. But my intention is to seek the pleasure of Allah alone and to try, as much as possible, to build something ethical, beneficial, and just by loving and following Prophet Muhammad ﷺ."

He also believes:

"True success is not only wealth, fame, or power. True success is becoming accepted by Allah and leaving behind benefit for humanity."

For this reason, The Muslim Company does not claim perfection.

Instead, the company will try to:

- Correct mistakes when they are discovered
- Accept truth when it becomes clear
- Protect ethics and justice
- Benefit humanity
- Keep accountability and humility
- Prioritize the pleasure of Allah above everything else

The company believes:

“Human beings plan, work, and struggle, but ultimate success, rizq, honor, and results belong only to Allah.”

Therefore, the journey of The Muslim Company will continue:

- Through tawakkul upon Allah
- Through sincerity
- Through halal effort
- Through Prophetic ethics
- And through continuous striving for goodness and benefit

InshaAllah, as far as Allah allows.

Institutional Protection, Mission Preservation & Emergency Dissolution Framework

Protection Against Ethical Collapse, Mission Betrayal & Unethical Takeover

The Muslim Company recognizes that over time many institutions lose their original vision due to:

- Greed
- Corruption
- Political influence
- Power struggles
- Ethical decline
- Uncontrolled commercialization
- Mission betrayal
- Leadership corruption

For this reason, the company seeks to establish a long-term institutional protection framework designed to preserve:

- The Prophetic Model foundation
- Shariah governance principles
- Ethical business systems
- Humanitarian responsibilities

- Public accountability
 - The founder's original vision
 - The civilization-focused mission
-

Mission Preservation Obligation

All future:

- Chairpersons
- CEOs
- Executive councils
- Directors
- Investors
- Strategic leaders

Will carry a moral and constitutional responsibility to preserve the company according to:

- Quran
- Sahih Hadith
- Prophetic ethics
- Supreme Shariah Board principles
- The original constitutional framework of the company

No leadership authority should have the right to intentionally:

- Destroy the company's ethical mission
 - Remove the Islamic governance structure
 - Eliminate the Prophetic Model
 - Convert the company into a harmful or unethical institution
 - Use the company against humanity or Islamic ethics
-

Emergency Ethical Dissolution Clause

If in the future:

- The company is intentionally transformed away from its Islamic and ethical foundation
- The Prophetic governance model is abandoned
- The constitutional mission is violated
- The company becomes controlled by unethical interests
- The company is sold in a way that permanently destroys its founding vision
- Or leadership knowingly betrays the company's foundational principles

Then an emergency constitutional dissolution mechanism may be activated.

Under this framework:

- 99% of the company's remaining eligible wealth, assets, and recoverable institutional resources may be redirected toward humanitarian, Islamic, educational, charitable, research, and social welfare causes.

These resources may support:

- Islamic organizations
- Charitable foundations
- Humanitarian NGOs
- Educational institutions
- Welfare projects
- Research initiatives
- Poverty relief systems
- Orphan and widow support programs
- Ethical development organizations
- Global humanitarian activities

The purpose of this clause is to ensure that if the company's mission cannot be protected, its resources should still continue serving humanity and beneficial causes rather than becoming tools of corruption or unethical exploitation.

Worker Loyalty & Lifetime Contribution Recognition System

The company believes workers who sincerely contributed to building the institution deserve recognition and respect.

Therefore:

- 1% of eligible remaining institutional value may be allocated for workers who served the company throughout its operational history.

The company may maintain a permanent digital historical worker archive containing:

- Names of workers and employees
- Duration of contribution
- Service records
- Contribution history
- Loyalty recognition records

This system may include:

- Current workers
- Former workers
- Retired employees
- Long-term contributors

The company believes:

“Institutions are not built only by founders and executives, but also by the workers, staff, and ordinary people who dedicated their time, effort, and loyalty.”

Constitutional Safeguards Against Unethical Sale or Takeover

The company may establish strict constitutional protections against:

- Forced unethical sale
- Hostile takeover
- Mission destruction
- Political capture
- Corruption-driven restructuring
- Removal of Shariah governance
- Exploitative ownership transfer

Future constitutional mechanisms may include:

- Supreme Shariah Board intervention powers
 - Mission preservation voting protections
 - Emergency ethical review systems
 - Long-term constitutional enforcement clauses
 - Founder vision preservation structures
-

Foundational Philosophy

The company believes:

“If an institution can no longer remain faithful to truth, justice, ethics, and the pleasure of Allah, then its wealth and power should continue benefiting humanity rather than becoming tools of corruption.”

For this reason, The Muslim Company seeks to build not only a successful institution, but also a protected ethical legacy designed to survive beyond individuals, generations, and changing times.

Global Governance Architecture

International Prophetic Governance Framework

The company seeks to establish a global governance structure based on:

- Quranic ethics
- Sahih Hadith
- Prophetic leadership principles
- Justice and accountability
- Responsible international cooperation
- Ethical institutional stability

The company may establish:

- International governance councils
- Regional leadership structures
- Country-level operational boards
- Global ethical coordination systems
- International Shariah compliance divisions

All governance should remain aligned with:

- Halal ethics
- Human welfare
- Transparency
- Public accountability
- Long-term civilization benefit

Enterprise Risk Management System

The company recognizes that responsible institutions must prepare for future risks.

The company may establish systems for:

- Financial crisis management
- Cybersecurity threats
- Supply chain disruption
- Political instability
- Economic collapse
- Environmental disasters
- Leadership corruption prevention
- AI misuse protection
- Emergency operational continuity

The company believes prevention and preparation are forms of responsibility and amanah.

Global Legal & Compliance Division

The company seeks to operate responsibly within international legal frameworks while maintaining Islamic ethical principles.

The company may establish:

- International legal advisory teams
- Ethical contract review systems
- Anti-corruption compliance units
- Halal financial compliance systems
- Global regulatory monitoring systems
- Intellectual property protection frameworks

The company believes laws should be respected as long as they do not force injustice or violation of core Islamic ethics.

Corporate Diplomacy & International Relations Framework

The company believes peaceful cooperation and ethical partnerships are important for global stability.

The company may establish relationships with:

- Universities
- Research institutions
- Humanitarian organizations
- Ethical corporations
- Technology institutions
- International development groups

The company seeks cooperation based on:

- Mutual respect
 - Justice
 - Ethical development
 - Knowledge sharing
 - Humanitarian benefit
-

Enterprise Intelligence & Strategic Research System

The company may establish advanced strategic research systems for:

- Market analysis
- Civilization forecasting
- Technology trend analysis
- Economic risk assessment
- Humanitarian intelligence
- Environmental research
- Future societal challenges

The company believes knowledge and preparation strengthen responsible leadership.

Corporate University & Knowledge Ecosystem

The company may establish:

- Universities
- Leadership academies
- Islamic economics institutes
- AI research centers
- Technology training institutes
- Research laboratories
- Skill development platforms

The company believes education and knowledge revival are essential parts of civilization-building.

Employee Health & Wellness Ecosystem

The company believes workers are human beings with physical, emotional, spiritual, and family responsibilities.

The company may establish:

- Employee healthcare support
- Mental wellness systems
- Family counseling support
- Emergency medical assistance
- Wellness and nutrition programs
- Spiritual and moral support environments

The company seeks balanced development rather than toxic corporate culture.

Innovation & Future Technology Research Labs

The company may establish research laboratories for:

- Artificial intelligence
- Robotics
- Renewable energy
- Ethical biotechnology
- Sustainable manufacturing
- Smart infrastructure systems
- Future civilization technologies

All innovation should remain under:

- Supreme Shariah Board oversight
 - Ethical review systems
 - Humanitarian evaluation
 - Environmental responsibility principles
-

Global Brand Protection & Authenticity System

The company may establish systems to protect:

- Brand integrity
- Public trust
- Product authenticity
- Intellectual property
- Ethical reputation

This may include:

- Trademark systems
 - Anti-counterfeit monitoring
 - Reputation protection divisions
 - Digital impersonation prevention systems
 - Verification infrastructure
-

Enterprise Financial Stability Framework

The company seeks long-term financial stability through halal and ethical economic systems.

The company may establish:

- Emergency reserve funds
- Ethical treasury management
- Diversified halal investment systems

- Inflation protection planning
- Long-term stability reserves
- Humanitarian financial backup systems

The company believes wealth must remain ethical, transparent, and socially responsible.

Ethical Smart City & Civilization Infrastructure Vision

The company may eventually contribute toward:

- Ethical smart cities
- Sustainable communities
- Knowledge-centered urban systems
- Halal economic districts
- Education-focused communities
- Environmentally balanced infrastructure

The company believes future civilization should remain:

- Ethical
 - Knowledge-driven
 - Environmentally responsible
 - Humanity-centered
-

Global Supply Chain Sovereignty System

The company seeks resilient and ethical supply systems.

The company may establish:

- Warehousing infrastructure
- Ethical logistics systems
- Supplier backup systems
- Local manufacturing hubs
- Food security systems
- Crisis distribution systems

The company opposes exploitative and unstable supply chain systems.

Corporate Reputation & Crisis Communication System

The company recognizes that misinformation and reputational attacks can harm institutions and public trust.

The company may establish:

- Ethical public relations systems
- Crisis communication frameworks
- Transparent media response systems
- Public clarification mechanisms
- Responsible information departments

The company believes truth and transparency are essential during crisis.

Institutional Memory & Historical Preservation System

The company may preserve:

- Historical records
- Strategic decisions
- Founder philosophy
- Institutional lessons
- Research archives
- Governance evolution history

The company believes preserving knowledge protects future generations from repeating mistakes.

Multi-Generational Leadership Development System

The company may establish:

- Youth leadership councils
- Ethical mentorship programs
- Leadership academies
- Internal succession training
- Executive development systems

The company believes future leaders should be developed through knowledge, ethics, discipline, and responsibility.

Global Humanitarian Command & Relief System

The company may establish humanitarian systems for:

- Disaster relief
- Refugee support
- Emergency healthcare
- Food distribution
- Crisis logistics
- Humanitarian coordination

The company believes helping humanity during crisis is a moral responsibility.

AI Ethics Oversight & Human Protection Framework

The company believes AI must remain under ethical and human supervision.

The company may establish:

- AI ethics review boards
- Human oversight protocols
- Algorithm fairness systems
- Bias detection systems
- Psychological harm prevention systems
- Child safety protections

AI should never become a tool of oppression, manipulation, or injustice.

Environmental Restoration & Creation Care Division

The company believes environmental responsibility includes restoration, not only protection.

The company may support:

- Reforestation
- Water restoration
- Wildlife rehabilitation
- Sustainable agriculture
- Carbon reduction initiatives
- Ecological balance projects

The company believes nature is part of Allah's creation and must be protected responsibly.

Independent Global Audit & Ethical Oversight Council

The company may establish independent oversight systems for:

- Ethical audits
- Financial reviews
- Public accountability
- Transparency evaluations
- International compliance reviews

The company believes independent accountability strengthens trust and institutional integrity.

Strategic Civilization Vision Office

The company may establish a long-term strategic office focused on:

- 50-year planning
- 100-year civilization forecasting
- Ethical future development
- Global technological change
- Muslim world development
- Human survival challenges
- Long-term knowledge advancement

The company believes institutions should think beyond short-term profit and focus on future generations.

Corporate Waqf & Perpetual Benefit System

Inspired by the Islamic waqf tradition, the company may establish:

- Educational waqf systems
- Healthcare waqf projects
- Research waqf infrastructure
- Humanitarian waqf funds
- Public welfare waqf programs

The company believes long-term sadaqah jariyah systems create lasting benefit for humanity.

Internal Media, Documentary & Knowledge Preservation Division

The company may establish internal media systems for:

- Documentary production
- Historical preservation
- Educational content
- Research publication
- Civilization storytelling
- Ethical journalism

The company believes truthful media can educate and positively influence society.

Family Governance & Founder Legacy Framework

The company believes leadership should remain merit-based and ethically responsible.

The company may establish:

- Founder family ethics rules
- Merit-based leadership standards
- Conflict prevention systems
- Family governance principles
- Wealth responsibility frameworks

The company believes leadership should be earned through responsibility and competence, not inherited automatically.

Human Rights, Dignity & Ethical Protection Charter

The company seeks to protect:

- Human dignity
- Fair treatment
- Anti-oppression principles
- Justice-centered governance
- Ethical accountability
- Respectful investigation systems

The company opposes:

- Abuse of power
 - Exploitation
 - Injustice
 - Humiliation
 - Discrimination without justice
-

The Muslim Company Global Civilization Blueprint

The company seeks to build a long-term civilization-focused roadmap including:

- Knowledge revival
- Ethical technological advancement
- Humanitarian development
- Halal economic systems
- Research expansion
- Educational growth
- AI governance ethics
- Environmental sustainability
- Global ethical cooperation

The company believes civilization should be built through:

- Faith
 - Knowledge
 - Justice
 - Ethics
 - Compassion
 - Innovation
 - Responsibility
-

Council of Ethical Scholars, Scientists & Strategic Experts

Integrated Knowledge & Ethical Guidance Council

The company may establish a permanent interdisciplinary council consisting of:

- Islamic scholars
- Scientists
- Engineers
- Economists

- AI researchers
- Doctors
- Psychologists
- Environmental specialists
- Strategic thinkers
- Humanitarian experts

The purpose of this council is to help the company responsibly navigate future civilization challenges according to:

- Quranic ethics
- Sahih Hadith
- Prophetic principles
- Verified scientific understanding
- Human welfare considerations

The company believes future challenges require cooperation between knowledge, ethics, and wisdom.

Future of Humanity Research Division

The company may establish dedicated research systems focused on major future risks facing humanity.

Research areas may include:

- AI civilization risks
- Global moral decline
- Mental health crises
- Family instability
- Water and food insecurity
- Economic injustice
- Digital addiction
- Spiritual emptiness
- Social fragmentation
- Human survival challenges

The company seeks to help build responsible long-term solutions through ethical research and Prophetic guidance.

Ethical Space & Future Civilization Program

The company recognizes humanity may one day expand beyond Earth.

The company may support research regarding:

- Ethical space development
- Human dignity in future civilizations
- Resource ethics

- Space governance ethics
- Future civilization sustainability
- Islamic ethical considerations in advanced societies

The company believes ethics and responsibility should continue wherever humanity progresses.

Children & Next Generation Protection Charter

The company believes children and future generations must be protected from harmful systems.

The company may promote:

- Child-safe technologies
- Ethical educational systems
- Anti-addiction digital design
- Child mental health protection
- Family-centered development
- Safe online environments
- Knowledge and moral development

The company believes future generations are amanah for humanity.

Marriage, Family & Social Stability Initiative

The company believes strong families create stable civilizations.

The company may support:

- Marriage counseling
- Family education systems
- Parenting support
- Ethical family media
- Social harmony initiatives
- Family-centered community programs

The company believes family stability is essential for healthy societies.

Civilization Archive & Knowledge Preservation Vault

The company may establish permanent archival systems for preserving:

- Research and discoveries
- Institutional knowledge

- Historical lessons
- Governance evolution
- Ethical decisions
- Founder philosophy
- Shariah rulings
- Scientific and educational resources

The company believes preserving knowledge protects future generations.

Decentralized Survival & Resilience Infrastructure

The company may establish distributed resilience systems for emergencies.

These systems may include:

- Independent energy infrastructure
- Emergency water systems
- Food reserve systems
- Distributed communication systems
- Backup operational facilities
- Crisis survival logistics

The company believes preparation strengthens humanitarian stability.

Ethical Economic Independence System

The company seeks long-term ethical independence from exploitative systems.

The company may support:

- Halal reserve systems
- Strategic food security
- Ethical technology independence
- Sustainable energy development
- Resource resilience planning
- Responsible financial independence

The company believes ethical independence protects long-term mission stability.

Civilization Ethics Laboratory

The company may establish advanced ethical evaluation laboratories.

Before large-scale implementation of new technologies or systems, reviews may include:

- Moral impact analysis
- Psychological impact review
- Family impact assessment
- Social stability analysis
- Spiritual and ethical evaluation
- Environmental impact review

The company believes innovation must remain under ethical supervision.

Global Muslim Innovation & Knowledge Network

The company may create global collaboration systems connecting:

- Muslim scientists
- Engineers
- Entrepreneurs
- Researchers
- Doctors
- AI specialists
- Educators
- Islamic scholars

The company seeks to help strengthen ethical knowledge ecosystems across the Muslim world.

Ethical Security, Defense & Human Protection Research

The company does not seek aggression or oppression.

However, the company may support ethical research regarding:

- Civilian protection
- Cybersecurity ethics
- AI warfare ethics
- Humanitarian defense systems
- Emergency protection infrastructure
- Peace preservation technologies

The company believes protection should remain ethical, defensive, and humanity-centered.

Post-Founder Continuity & Institutional Preservation Doctrine

The company recognizes many institutions collapse after the founder's death.

Therefore, the company may establish:

- Founder philosophy archives
- Institutional continuity systems
- Leadership transition frameworks
- Long-term mission preservation protocols
- Ethical succession systems
- Institutional memory preservation tools

The company believes visions should survive beyond individuals.

Global Language, Translation & Knowledge Accessibility Mission

The company believes knowledge should remain accessible to humanity.

The company may support:

- Multi-language education systems
- Ethical AI translation tools
- Global educational accessibility
- Translation of beneficial knowledge
- Cross-cultural learning systems

The company believes language should not become a barrier to beneficial knowledge.

Ethical Social Media & Digital Community Ecosystem

The company recognizes many digital systems exploit addiction and negativity.

The company may develop:

- Ethical social platforms
- Healthy engagement systems
- Educational digital communities
- Anti-addiction algorithms
- Responsible communication platforms

- Positive knowledge-sharing systems

The company believes technology should strengthen humanity, not weaken it.

Human Purpose, Spiritual Crisis & Mental Well-Being Research

The company recognizes modern societies face growing:

- Loneliness
- Depression
- Meaninglessness
- Digital emptiness
- Social isolation
- Spiritual confusion

The company may research Prophetic and ethical approaches toward:

- Mental well-being
 - Human purpose
 - Spiritual balance
 - Emotional stability
 - Community connection
 - Moral development
-

Truth Preservation & Anti-Manipulation Framework

The company believes truth is essential for justice and civilization stability.

The company may establish systems for:

- Deepfake detection
- Information verification
- AI misinformation defense
- Authentic knowledge preservation
- Ethical journalism standards
- Truth-based communication systems

The company opposes manipulation, deception, and intentional misinformation.

Global Ethical Economic & Transparency Index

The company may help develop international ethical evaluation systems for businesses.

These systems may review:

- Transparency
- Fairness
- Worker treatment
- Environmental ethics
- Halal compliance
- Anti-corruption standards
- Public accountability

The company believes ethical measurement encourages responsible development.

The Muslim Company World Charter

The company may establish a civilization-scale ethical charter explaining:

- Human dignity
- Justice and responsibility
- Ethical technology principles
- Knowledge obligations
- Environmental stewardship
- Compassion and coexistence
- Spiritual balance
- Long-term civilization ethics

The company believes humanity requires balanced moral direction.

Civilization Collapse Prevention & Restoration Framework

The company recognizes civilizations can collapse due to:

- Moral decay
- Corruption
- Family destruction
- Knowledge decline
- Economic injustice
- Abuse of power
- Spiritual collapse
- Technological misuse

The company may research and develop systems to help prevent civilizational decline through:

- Ethical governance
- Knowledge revival
- Strong family systems
- Justice-centered economics
- Responsible technology
- Spiritual balance
- Humanitarian development
- Prophetic ethical principles

The company believes civilizations survive through truth, justice, knowledge, responsibility, and moral discipline.

Final Philosophy

The Muslim Company seeks to create a future where:

- Faith and technology work together
- Business and morality remain connected
- Human development remains ethical
- Nature and civilization remain balanced
- Knowledge, justice, and compassion guide leadership
- Economic systems serve humanity rather than exploit it

The company ultimately aims to build a global ethical civilization model inspired by Islamic values, knowledge, justice, sustainability, and service to humanity.
